Rosen is the best TA ever. What he does were literally beyond the responsibility of a normal TA. He is so patient and helpful. I would like to have him be my TA for every course.

Andrew was amazing in every possible way and super helpful all the time. His discussion sessions were very useful and he was always quick to get back to questions.

Andrew was very good at running the calculation sessions and responding to emails when asking for help.

The TA was available even by emails to answer questions. That was helpful because I couldn't go to regular office hours due to work schedule.

Andrew, honestly you are one of the most effective and dedicated TAs I've ever had. You were well prepared at every office hour and were able to answer questions conceptually and thoroughly without simply giving the answer out. During calculation sessions you were very helpful in explaining more conceptually difficult topics, and you made it much less terrifying to come up to the board. You significantly contributed to my understanding of the course material, and your humorous comments on the homeworks were always welcome. Thanks for being awesome!

Literally the best TA I have had in my educational career. No weaknesses of note.

Andrew is the one of the best TA I have ever met. Very lucky to meet with him. He is so kind and help me a lot. I can get reply even at 11:00 pm. His kindness deeply moved me. Thank him so much.

Andrew went above and beyond for this course! He made himself very accessible throughout the entire quarter and was very active in clarifying homework questions/hints via Canvas announcements when he received certain questions from students multiple times. He was always extremely prepared for office hours and when these sessions were quite packed, he did a nice job of leading his office hours in an organized way so that all attendees could get the most out of them. In addition to all of this, Andrew was very encouraging. His dedication to the course was truly remarkable and much appreciated.

Andrew was very responsive, helpful, and always went above and beyond with anything he did for the course.

Andrew is an exceptional TA. I don't have a single complaint about him. He put a significant amount of time into making resources for the students, and was incredibly responsive.

Super helpful and provided just enough guidance when needed to understand a problem. Super amazing, patient, smart, and an all around great TA.

He is by far the best TA I have had since coming to Northwestern, by a large margin. He is so friendly and patient and able to explain everything to us, which is rare for a grad class TA. I am so appreciative that he is in our department.

Andrew Rosen is a gift to this university. I've never stumped him on a question, I always leave conversations about questions fully-satisfied and then some, and he goes at an incredibly reasonable pace during things like calculation sessions.

Andrew is definitely one of the best TAs in the department. He goes above and beyond (even offering to scan back graded homeworks to us the night before our midterm). He is very good at teaching and facilitating discussions, and is very fair when it comes to grading.

Very helpful in office hours.

Andrew is the best TA on the planet. The amount of time, energy, and thought that he put into helping us was incredibly appreciated. I can not think of anything he could have done better. In fact, he did things that I couldn't have even thought of to improve the experience/learning of the course (the extensive calculation session solutions were amazing!). I wish Andrew could be the TA for every course I will take and every course I have ever taken. I cannot say enough good things about him.

Phenomenal at responding to questions while encouraging students' abilities to reason through problems. Found the right balance between guidance and provoking student's thoughts in class. Always extremely helpful during calculation sessions and reachable through e-mails. Comments on homeworks were cheerful and made reviewing graded assignments a joy.

Andrew is the best TA I have ever had! He is extremely helpful outside the class and is willing to spend a lot of time with his students. I highly appreciate all the efforts he had put into this class. I would definitely feel upset if he didn't get the best TA award.

Andrew was good at helping students in the calculation modules and in office hours. He has a level head and wants the best for his students in ensuring that they are successful. He can come off as a bit of a know-it-all and while it is likely not intentional, it still makes the impact. He made some great online notes from past material in the course, and in heat/mass. Overall, he could learn a bit more patience in helping students, but he was effective.

Andrew Rosen is truly a champion amongst the first-years. His soothing words calm our troubled minds, his graceful hand elucidates abstract notions of ensembles and hyperspheres, and his eyes burn and shimmer with that enigmatic blend of knowledge, confidence, and empathy. On behalf of all the potential pain you have protected us from - bravo, dear Andrew, bravo.

Andrew was a pretty great TA and I really enjoyed having him for this course. He was both very knowledgeable and fun to learn from.

<td>Andrew is probably the best TA I have ever had in my academic career - he came to each calculation session and his office hours very well-prepared, and he answered any questions I had very clearly and promptly. Not only is he knowledgeable, but also very enthusiastic about teaching the subject. I think he deserves another TA award! The G.O.A.T. If he doesn't get the TA award, it is rigged. Extremely responsive, tries very hard to design calculation sessions to enhance learning, very knowledgeable in office hours. Andrew is the greatest TA ever. Went above and beyond to make our lives easier; was really empathetic and approachable. Thank you for all your help.</td>
